

At the moment we can witness the **mass digitalization going on in business and society**: Intelligence is added to everything (from cars, TVs to watches) and gaining ground not just in technology-heavy (e.g. telecom, banking), but even in the most traditional industries (like manufacturing). Digitalization and software innovation is of paramount importance in market competition: the best, most successful companies rely on their business processes being run by first-class enterprise software, providing speed, connectedness and efficiency.

We are [BlackBelt](#), a **software innovation company**, a robust team of more than 200 professionals with world-class expertise gathered in Budapest, one of the fastest-growing tech capitals of the European Union.

Our “black belt” software engineers can **easily translate industry-specific requirements to language of developers** and form **rapidly deployable nearshore teams**.

We utilize **low-coding platforms**, replacing the majority of traditional programming (e.g. hand-coding) activities done by human developers with software robotics (automated programming) in a model where human developers only need to do critical tasks.

Our services:

- **providing professional IT resources, dedicated nearshore teams**
- **extremely fast and custom software and application development**
- **application integration (creating unified and efficient enterprise platforms)**
- **building well-operating R&D centers**

By utilizing these technology platforms and with the help of our senior team we can dramatically cut the time and effort needed for development therefore the time-to-market for clients, too.

Blackbelt can boost your software innovation by

- **rapid prototyping and fast software developments** resulting your first prototypes in **2 weeks**, your first software release to users (minimum viable product; MVP) in **2 months**;
- providing **dedicated senior teams** to **develop your product** or **improve your operations** and **internal processes**;
- building up, managing and transferring software development and project management (i.e. R&D center) organizations leading to **your turnkey development center in Budapest**.

We are proud that we can refer to **Ericsson** and several other companies e.g. **Philip Morris International, KPMG, T-Systems, Harman, MetLife, UniCredit, ExxonMobil, Avon, Bosch, KBC equitas, Raiffeisen Bank, Erste Bank, Knorr-Bremse**, as our satisfied clients.

These **world-class services** are available at a **very reasonable and competitive price**. Please, do not hesitate to **contact us**.
