

AN URBAN INDOOR COMPOSTING SYSTEM THAT CREATES A CIRCULAR ECONOMY.

As city dwellers, we are often isolated from our green environment, so we don't know how we can contribute to helping nature circulate.

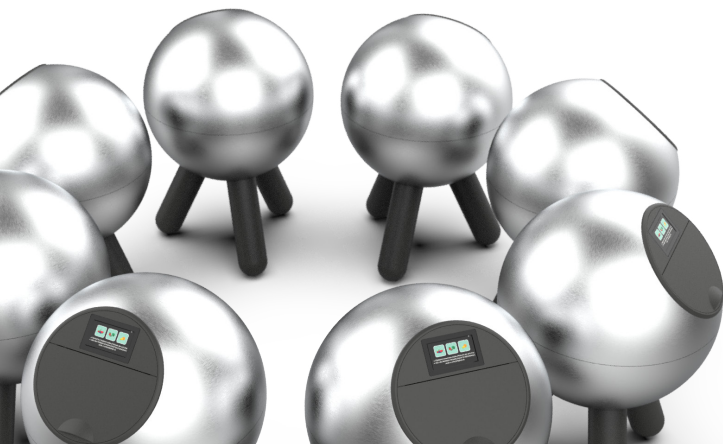

BUT HOW CAN WE DO AGAINST IT ON A DAILY BASIS? LET ME SHOW YOU HOW!

We have developed a playful and educational system that allows us all to make a more liveable future for our communities and for our Earth.

WHAT SOLUTIONS DOES COMPOCITY OFFER?

- It is a convenient, automated solution for recycling household kitchen waste.
- It helps us understand playfully the daily nutrient cycle.
- It tracks how our routine rehabilitates the city's green spaces.

HOW DOES THE COMPOCITY SYSTEM HELP?

- It is a convenient, automated solution for recycling household kitchen waste.
 - CompoCITY is designed for indoor operation, it has no unpleasant odors, no daily maintenance, and no worms. Friendly microorganisms do most of the work.
- The system senses the condition of the CompoMIX (composed material) and suggests the appropriate utilization method based on the built-in sensors data
- With this app you can track your progress and have the opportunity (for example) to develop your own online forest in proportion to the reduction of your ecological footprint. This adds extra motivation to your daily awareness.
- You can create community missions via an „admin” interface. It encourages you to transform the previous waste into real nutrients with educational elements.

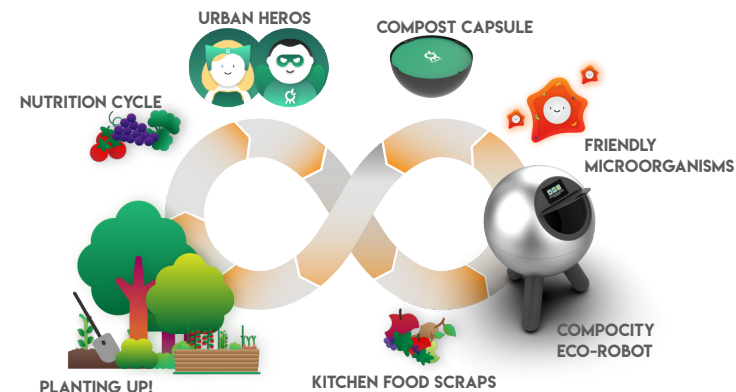

OUR TEAM

OUR SERVICES

We have three main pillars:

- Providing a smart composting eco-robot with consumables
 - CompoMIX use support / or sales
- A freemium gamified application
 - Forming an attitude enriched with playful challenges
 - Continuous trackability of individual and group performance with educational content
- Admin interface
 - Customizable community missions (quests)
 - Reporting the ecological contribution of results

HOW CAN WE CREATE VALUE TOGETHER?

We offer fully personalized service packages, with flexible payment options:

Entry fee / monthly subscription options:

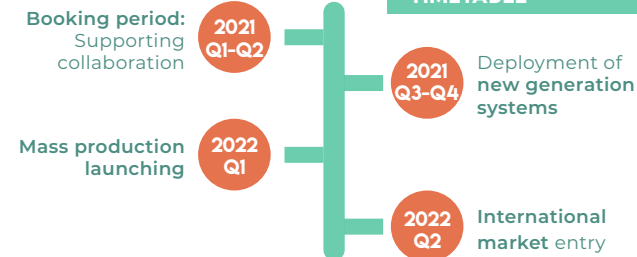

- Monthly subscription fees with 2 year loyalty contract:
Deposit: 720 EUR
Monthly fee: 140 EUR/month

One time purchase, you can get our eco-robot for only 1400 EUR instead of 1700 EUR with monthly maintenance fee for a pre-determined period: 90 EUR/month with a 2 year loyalty contract.

Our additional services:

- Educational workshops tailored to individual needs
- Events, sustainability consulting
- Supporting HR and Employer Branding efforts
- Offer CSR campaign opportunities
