

Animal Health Naturally **immunovet**

NATURAL IMMUNE BOOSTER FOR PETS, FARM AND ZOO ANIMALS

**PROUD TO SUPPORT
THE HEALTH OF MAJESTIC ANIMALS AT**

Immunovet is a natural complementary food for pets, farm and zoo animals, marketed worldwide since 2003. The main ingredient of Immunovet is a patented fermented wheat germ extract which is produced through a complex biotechnological process without chemicals to best protect the health of animals.

Immunovet has been widely researched for its immunomodulatory qualities and has been proven to help maintain the general good condition of healthy animals and enhance the efficacy of medical treatments.

**A PLANT-BASED NATURAL PRODUCT, IT IS CURRENTLY AVAILABLE
IN THE UNITED STATES, THE UNITED KINGDOM, NEW ZEALAND AND MEMBER
STATES OF THE EUROPEAN UNION.**

**IMMUNOVET IS AVAILABLE AS A FEED ADDITIVE POWDER TO FARM ANIMALS,
HORSES AND ZOO ANIMALS. PET OWNERS CAN CHOOSE BETWEEN TABLETS AND A POWDER
FORMAT FOR THEIR DOGS AND CATS, WHILE A VERY SMALL SIZED TABLET IS
PRODUCED ESPECIALLY FOR SMALL MAMMALS.**

- ▶ Developed and manufactured by the company behind Avemar, one of the world's best natural complimentary products for cancer patients, using a similar active ingredient 100% natural and safe
- ▶ No chemicals
- ▶ Clinically proven benefits
- ▶ Perfect for prevention
- ▶ Perfect for supplementing medical treatments
- ▶ Made from fermented wheat germ extract
- ▶ Plant based
- ▶ Non-GMO
- ▶ Available and recommended by vets worldwide since 2003

IMMUNOVET BENEFITS FOR PETS

- ▶ Immunostimulant effect
- ▶ Anti-inflammatory effect
- ▶ Antioxidant effect
- ▶ Supports maintaining a healthy state
- ▶ Improves the effectiveness of vaccinations
- ▶ Better quality hair / hair growth when recovering from diseases with fur and skin related symptoms (hair loss, itching, ear infections)
- ▶ Increased activity (multiple games, more dynamic movement, less sleep)
- ▶ Better appetite, increased weight gain
- ▶ Helps with stress
- ▶ Support in a weakened state
- ▶ Positive effect on the integrity of intestinal epithelial cells, support for the natural protective function of the intestinal tract (protection against harmful substances absorbed by food)

IMMUNOVET BENEFITS FOR FARM AND ZOO ANIMALS

- ▶ Significantly increases weight gain, milk- and egg production
- ▶ Has beneficial effects on the immune system leading to less diseases and animal loss in every researched population
- ▶ Improves feed conversion ratio
- ▶ Leads to more effective vaccination due to its immunostimulant properties
- ▶ Results in better reproductive biological indicators
- ▶ Caused no side effect in the investigated species
- ▶ Consequently can decrease antibiotic usage on farms due to its performance enhancer and health promoter effects
