

Duroset Technologie Plastics Müanyagfeldolgozó Kft., founded in 2009, is the 100% subsidiary of an Austrian-owned company, which has specialized in the fields of plastic injection molding for more than 30 years.

Duroset Technologie Plastics Müanyagfeldolgozó Kft. uses both **Thermoplastic** and **Thermoset** raw materials and produces plastic parts for several industrial branches and application fields such as automotive, electrical, construction, household, entertainment, etc.

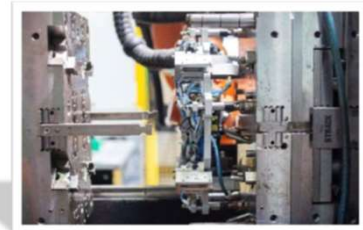

The majority of the production processes are automated. In addition, special manufacturing technologies such as 2K-injection molding or insert-injection molding can be carried out at Duroset.

Today, 50 employees work in our production plant near the Austrian border in Sopron, Hungary.

What do we offer:

Machine pool

- Injection molding of thermoset materials (60t – 220t)
- Injection molding of thermoplast materials (40t – 300t)
- 2K-injection molding
- Automated insert-injection molding
- Ultrasonic welding and Heat-Stake machine

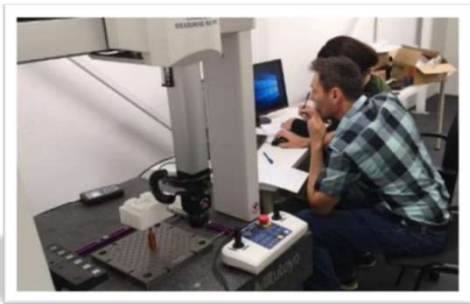

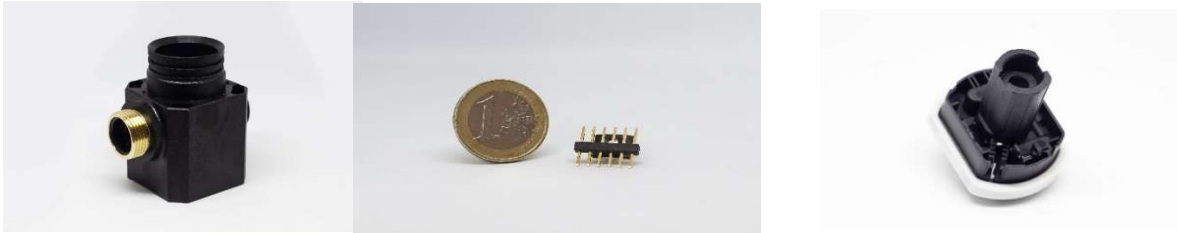

→ Injection mold manufacturing

- EDM machine
- Milling machine
- Turning machine
- Drill machine
- Assembly area

Services

- Project management including support of product development
- Development and manufacturing of injection molding tools
- Maintenance services for tools
- Manufacturing of assembly jigs
- Assembly, labeling and packaging processes
- Parts-washing system
- Implemented Quality Assurance System

Quality Assurance System

- **IATF 16949** certification
- Mitutoyo 3D CNC measuring device
- Optical measurement systems
- QS-manager, laboratory, process control

Your advantages in brief

- More than 30 years experience in plastic injection molding
- European manufacturer = short communication & transportation distances
- **IATF 16949** certified
- Products with high technical content and high added value
- Own tool shop which is fully equipped
- Own mold manufacturing for our customers
- High-, Mid- and- Low-volume products
- Niche supplier with high flexibility
- Assembly work capacities
